

WalletVibe Codebase Metrics & Cost Analysis

Executive Engineering Audit, Token Trajectory & Firestore Storage Analysis

TOTAL CODEBASE LINES & TOKENS 20,693 LOC 213,648 Base Tokens (56 Files)	EST. 15X AGENTIC API COST \$12.82 USD ≈ ₹1,070 INR (15x Iteration Multiplier)
HUMAN ENG. EQUIVALENT 828 Hours ≈ \$41,400 USD Value Created	FIRESTORE TIER LIMIT 1.0 GB Firebase Spark Free Quota Active

■ TOTAL OVERALL DEVELOPMENT COST SUMMARY:

- TOTAL AGENTIC DEVELOPMENT COST (15x Tokens): **\$12.82 USD (≈ ₹1,070 INR)**
- EQUIVALENT HUMAN SOFTWARE DEV COST (828 Hours): **\$41,400.00 USD (≈ ₹34,57,000 INR)**
- TOTAL ENGINEERING COST SAVINGS: **\$41,387.18 USD (99.97% Cost Savings via Agentic Automation)**

1. Firestore Database Storage & 90% Threshold Protocol

Firestore Spark Free Plan includes **1.0 GB (1,024 MB / ~1,073,741,824 Bytes)** of stored data.

- **Live Occupancy Inspection:** Firebase Console (console.firebase.google.com) → Project **WalletVibe** → **Firestore Database** → **Usage** tab.
- **What if Storage Reaches 90% (900 MB)?** Upgrading to the Firebase **Blaze Plan** removes the 1 GB cap. Additional storage beyond 1 GB costs only **\$0.18 per GB per month** (approx ₹15/month per extra GB).
- **Caching Protection:** WalletVibe uses local snapshot caching (ww_cached_snapshot_*) so clients sync delta changes without inflating Firestore reads or storage.

2. Agentic Cost & Token Trajectory Breakdown (15x Iteration Model)

NOTE ON ITERATION MULTIPLIER: To develop a 20,693 LOC production codebase, multiple agentic iterations happen (prompting, file reading, code generation, debugging & refactoring). The overall cost is calculated using a **15x iteration multiplier** ($15 \times 213,648 = 3,204,720$ Total Tokens).

Metric Category	Token Volume	Iteration Multiplier & Purpose	Estimated Cost (USD)
Raw Codebase Snapshot	213,648 Tokens	1.0x Base Repository (20,693 LOC)	Static Code Base

Agentic Input Trajectory	2,563,776 Tokens	12.0x Context & Workspace Reads	\$6.41 USD (@ \$2.50/1M)
Agentic Output Tokens	640,944 Tokens	3.0x Generated Code & Refactors	\$6.41 USD (@ \$10.00/1M)
TOTAL 15X AGENTIC COST	3,204,720 Tokens	15.0x Full Development Cycle	\$12.82 USD (≈ ₹1,070 INR)

3. Top Codebase Files by Token Density

File Path	Lines (LOC)	Characters	Estimated Tokens
src/styles.css	2,486	59,624	16,115 tokens
src/components/ReportsView.jsx	1,775	86,448	23,365 tokens
src/components/BankSearchModal.jsx	1,010	43,569	11,776 tokens
src/components/CsvImportModal.jsx	924	39,554	10,691 tokens
src/components/AdminPanel.jsx	865	44,195	11,945 tokens
src/components/PersonMergeModal.jsx	731	28,923	7,818 tokens
src/api/subscription.js	628	18,943	5,120 tokens
src/App.jsx	622	22,178	5,995 tokens
src/components/RatingModal.jsx	592	22,241	6,012 tokens
src/components/LegalModal.jsx	530	28,168	7,613 tokens
src/components/SubscriptionModal.jsx	515	27,447	7,419 tokens
src/components/MultiSelectCombobox.jsx	440	15,404	4,164 tokens
src/components/SettingsModal.jsx	423	19,471	5,263 tokens
src/components/Header.jsx	416	18,011	4,868 tokens
GROSS TOTAL (Entire 56 Workspace Files)	20,693 LOC	790,497 Chars	213,648 Base Tokens (3.20M Trajectory)
